WIRING HARNESS ASSEMBLY DIAGRAMS

PAGE 1.....WIRING HARNESS DETAIL "A"

Page one is a sketch of how the harness will look after it is unpacked and laid out. Each wire is fully terminated and labeled for ease of installation. The circled numbers of DETAIL "A" are for reference only...ie: The circled number 1 is to refer you to line 1 in the table at the bottom of the page. Line 1 gives the description of the wire group and the label numbers found in that group.

PAGE 2.....WIRING HARNESS ROUTING DETAIL "B"

After routing, the harness layout will look approximately like this drawing looking down through the top of the car. The circled numbers are the same reference numbers found on page 1 and are for group identification only. At the bottom of the page is a description of the label numbers. Each number has a specific function and the hookup of the numbered wires is given on pages 5, 6, 7 & 8.
